 INSTRUMENT CORP.

THE ULTIMATE IN A 36
DEGREE ROTATION, SINGLE DECK ROTARY SWITCH, A SUBMINIATURE PRECISION ROTARY SELECTOR SWITCH, THE SERIES 1150 IS 0.320 INCHES IN DIAMETER AND RATED AT 25,000 OPERATIONAL CYCLES. IT HAS BEEN ENGINEERED TO MEET ALL APPLICABLE REQUIREMENTS OF MIL-DTL-3786.

## The Innovative Switch Company

The basic series II50 is available as a I pole, 2-I0 position or a 2 pole, 2-5 position switch. It is a non-shorting switch with 36 degree indexing. It has PC terminals and shaft seals for contaminant free operation.

The Series II50 is well suited for avionics, communications, test equipment and command and control applications where space is at a premium and tough environmental reliability requirements are necessary.

Quality construction, including materials that meet the strictest standards, allows these subminiature switches to combine superior current switching capabilities with constant low contact resistance. Exceedingly stringent manufacturing processes, inspection and testing requirements ensure long life and high reliability.

The $\mathrm{A} \mid \mathrm{I} 50$ and $\mathrm{B} \mid \mathrm{I} 50$ are designed for the addition of a panel seal. These switches are perfect for miniature switch applications where contamination control is a must and harsh environments are expected. They are ideal when long life and precision in extreme conditions are necessary.

## 1150 SERIES

Subminiature Enclosed Precision Rotary Switch

The AII50 uses the same body as the standard II50 but with a smaller shaft and ferrule to allow a panel seal. The BII 50 uses the standard II 50 shaft and ferrule sizes with a larger body diameter to allow a panel seal.

## NOTES:

1150-. 125 Shaft Dia., . 250 Ferrule Dia., . 320 Body Dia., No Panel Seal, (See Page 3)
A1150-. 100 Shaft Dia., 10-32 Ferrule Dia. (. 189 Ferrule Dia.), 320 Body Dia., Panel Seal, (See Page 4).
B1150-. 125 Shaft Dia., . 250 Ferrule Dia., . 375 Body Dia., Panel Seal, (See Page 5).

## 1150 - NO PANEL SEAL

Notes:

1. Dimensions are in inches.
2. Unless otherwise specified, tolerances are $\pm .005$ and $\pm 3^{\circ}$ on angles (non-accumulative).
3. The screw-driver slotted shaft dimensions are indicated; all other remains the same.

The slot in the shaft lines up with the point of contact of pole number one.
5. Switch is available with non-shorting contact only.
6. See page 6 for circuit diagram and all typical features.

## ORDERING INFORMATION

Sample code

## OPTIONS

The following options can be added to the standard switch. When ordering, simply add the letter after the basic part number.

F =Fixed stop between the first and last position on the 10 position switch
$P=$ Seal (shaft only)
SD = Screwdriver Slot
S = Shorting (not available)

## 1150 SERIES

## Subminiature Enclosed Precision Rotary Switch

## A1150 - SMALLER FERRULE

1. Dimensions are in inches.
2. Unless otherwise specified, tolerances are $\pm .005$ and $\pm 3^{\circ}$ on angles (non-accumulative).
3. The screw-driver slotted shaft dimensions are indicated; all other remains the same.

The slot in the shaft lines up with the point of contact of pole number one.
5. Switch is available with non-shorting contact only.
6. See page 6 for circuit diagram and all typical features.

ORDERING INFORMATION
Sample code

The 1150 series without options if furnished with PC termination, non-shorting and without shaft and panel seals. The standard 10 positions switch is continuous rotation.

## OPTIONS

The following options can be added to the standard switch. When ordering, simply add the letter after the basic part number.

F = Fixed stop between the first and last position on the 10 position switch

P = Seal (shaft and panel)
SD = Screwdriver Slot
S = Shorting (not available)

## B1150 - LARGER BODY DIAMETER

Notes:

1. Dimensions are in inches.
2. Unless otherwise specified, tolerances are $\pm .005$ and $\pm 3^{\circ}$ on angles (non-accumulative).
3. The screw-driver slotted shaft dimensions are indicated; all other remains the same.

The slot in the shaft lines up with the point of contact of pole number one.
5. Switch is available with non-shorting contact only.
6. See page 6 for circuit diagram and all typical features.

Series 1150 Technical Data

| Specification | Unit | Value | Note: |
| :---: | :---: | :---: | :---: |
| Military Specifications |  | MIL-DTL-3786 |  |
| Continuous (Non-Switching) Current Carrying Capacity | Amps | 3 | at 28 VDC, with max. contact temperature rise of $20^{\circ} \mathrm{C}$ |
| Switching Current Capacity at 28 VDC resistive | Amps | 0.200 | at Atmospheric pressure with $85^{\circ} \mathrm{C}$ and at reduced Barometric pressure with $25^{\circ} \mathrm{C}$ |
| Switching Current Capacity at 115 VAC resistive | Amps | 0.150 |  |
| Switching Current Capacity at 28 VDC inductive ( 2.8 H .) | Amps | 0.100 |  |
| Switching Current Capacity at 28 VDC Lamp Load | Amps | 0.100 |  |
| Low Level max. capacity | mA | 10 | at 30 millivolts DC max. |
| Dielectric Strength, min. | VRMS | 500 |  |
| Contact resistance, max. (initial) | milliohms (mS) | 10 |  |
| Contact resistance, max. (after life) | milliohms (ms) | 50 |  |
| Insulation resistance, min. (initial) | megaohms (M) | 50,000 | at 100 VDC |
| Insulation resistance, min. (after life) | megaohms (M) | 10,000 | at 100 VDC |
| Switching Life | cycles | 25,000 | at rated loads, sea-level, $25^{\circ} \mathrm{C}, 68 \%$ relative humidity |
| Mechanical Life | cycles | 25,000 |  |
| Rotational Torque, min. | inch ounces | 3 |  |
| Rotational Torque, max. | inch ounces | 6 |  |
| Stop Strength, max. | inch pounds | 5 |  |
| Mounting Ferrule Strength | inch pounds | 12 to 15 |  |
| Withstanding Shaft Push Force | pounds | 100 |  |
| Weight | grams | 4 |  |
| Molded Parts |  | thermoplastic |  |
| Contact Surfaces |  | Gold plated |  |
| Altitude | feet | 70,000 | typical pressure at 70,000 feet: 0.64 psi |
| Temperature, min. | degrees Celsius | -65 |  |
| Temperature, max. | degrees Celsius | 85 |  |
| Vibration Tested |  | Meets | Per MIL-DTL-3786, MIL-STD-202, Method 204, test condition "B", vibration grade 3 |
| Impact Shock, Medium |  | Meets | MIL-STD 202; Method 213 |
| Impact Shock, High |  | Meets | at 100g, MIL-STD 202, Method 207 |
| Moisture Resistant |  | Meets | MIL-STD 202; Method 106 |
| Salt Spray Resistant |  | Meets | MIL-STD 202, Method 101, Condition "B" |
| Explosion Proof |  | Meets | MIL-STD 202, Method 109 |
| Immersion |  | Meets | 3 feet water, MIL-STD-202, method 104, test condition "C" |
| EMI/RFI |  | Meets | MIL-DTL-3786, 2 ohms Shaft to ground max. |
