

23 January, 2024

REACH Certificate of Compliance

The products sold by our company are in full compliance with EU Directive 1907/2006 known as REACH for Registration, Evaluation, Authorization and Restriction of Chemicals. This compliance includes all additions to this list of Substances of Very High Concern ("SVHC"), up to and including those of January 17, 2023.

The products we sell are considered components / assemblies and are not raw materials. That means they are categorized as articles under the REACH regulations. As such they do not release substances during normal and reasonably foreseeable conditions of use.

The products we sell:

- Do not contain more than 0.1% by weight per article of any substance on the SVHC candidate list referenced above, or;
- If a product is found to contain more than 0.1% of any SVHC by weight per article, International Precision products BV will notify the intended recipients and will work to reduce SVHC content to allowable levels.

We will continue to monitor the status of the SVHC candidate list as part of our ongoing compliance activities, including the need to inform product recipients if any article contains more than 0.1% by weight per article of any substance that is added to the SVHC candidate list in the future. For additional information please contact IPP: ask@ippbv.com.
